Abstract (en)

[origin: EP0591825A1] The invention relates to a method and apparatus for processing at least two synthetic yarns 2 and 3 running side by side at a distance in a textile machine 1, the yarns being guided through at least two successive processing stations, the processing surfaces of which are at right angles to one another. At the same time, between the processing stations 8 and 9, the yarns 2 and 3, positively maintaining a distance between them, are guided out of a first running plane of the processing station 8 run through into a second running plane of the processing station 9 to be run through. <IMAGE>
