Abstract (en)

[origin: EP0591913A1] The timepiece includes a timekeeper for displaying the hour and the minute by means of hands (4, 5) surmounting a dial (80) surrounded by a bezel (7) and a receiver capable of receiving personal paging messages stemming from at least two call numbers. The call numbers (81) are written in clear or in coded form on the bezel and means are employed so that, on receiving a message, the latter is placed in memory and so that the hands (4, 5) abandon their time-indicating function in order to display, by coming into superposition (4', 5'), the call number which issued the message. <IMAGE>
