Abstract (en)

[origin: EP0591934A1] A novel photographic processing composition is provided, comprising at least one of compounds represented by the following general formula (I) or salts thereof: <CHEM> wherein R1 represents a carboxyl, aliphatic or aromatic group; R2 and R3 each represents a carboxyl, phosphono, sulfo or hydroxyl group; L1, L2, L3 and L4 each represents an alkylene group; X represents a hydrogen atom, aliphatic group or aromatic group; M represents a hydrogen atom or cation; and m and n each represents an integer 0 to 3. A novel method for the processing of a silver halide photographic material is also provided, which comprises the processing of a silver halide photographic material which has been imagewise exposed to light with a processing solution containing at least one of the compounds represented by the general formula (I) as defined above or salts thereof.
