Abstract (en)

[origin: EP0592329A1] Apparatus for producing trenches of great depth, of the type including a chassis equipped with cutting drums at its lower part. The chassis (1) is equipped at its upper part with at least one guide stop (4) capable of being displaced between a deployed upwards position in which it increases the effective length of the chassis (1) during operation of the apparatus, and a downwards retracted position in which it decreases the overall size of the chassis (1) while the apparatus is being transported. <IMAGE>
