Abstract (en)
[origin: EP0592357A1] The running gear has pairs of rollers (19) which are attached to a roller carrier (7) and which are mounted in a rail (11) embedded in the cover (9) of a cupboard (10). The roller carrier (7) is pivotably mounted by means of its basic body (13) in the receiving sleeve (5) which is fastened to the sliding door (1). By pushing the receiving sleeve (5) onto the basic body (13) of the roller carrier (7), the sliding door (1) can be connected to the cupboard (10) quickly and without a tool. <IMAGE>
