Abstract (en)
[origin: EP0521410A1] A sales package (1) or holder, consisting of an integral card-type cardboard or paperboard part (2) made of thin, foldable material for the visible display of at least one article (8, 25, 32, 52), at least one region which projects from the plane of the card-type part (2) holding the article, is to be produced with less use of cardboard or paperboard material. This is achieved in that the card-type part (2) is of single-layered construction and has at least one element (3, 4, 15, 15'), which projects like a flap in the shape of a tongue, preferably approximately at right angles, from the card-type part (2), with a receiving opening (6, 7; 7'; 7'') for the article (8, 25, 32, 52), the edge of said element forming a stop region for the article. <IMAGE>
