Abstract (en)
A flower pot cover, made of a material which is closed upon itself and is elastically extensible to a limited degree in the circumferential direction owing to multiple-fold deformation, consists of a water-repellent paper. The multiple-fold deformation is formed by crimping instead of by pleating.

Abstract (de)
Eine Topfmanschette aus einem in sich geschlossenen, aufgrund von vielfacher faltiger Verformung in Umfangrichtung begrenzt elastisch dehnbaren Material besteht aus einem wasserabweisenden Papier. Die vielfache faltige Verformung ist - statt durch Plissierung - durch Kreppen gebildet.
