Abstract (en)  
[origin: EP0592825A2] A height-adjustable table, in particular desk, with at least one table leg, is characterised in that the table leg (3) comprises two vertical outer tubes (4) which are interconnected by a central web and in which inner tubes (5) are telescopically guided, it being possible to fix the inner tubes jointly at different height positions relative to the outer tubes (4) by means of a locking and clamping mechanism. <IMAGE>
