Abstract (en)

[origin: WO9301031A1] The device comprises a workstation (2) with a supporting structure (9) and with a web-transporting device (11), a cross-cutting device (13) and a folding device (14), mounted on the supporting structure (9) and further comprises a collecting device (3) for collecting the web parts into stacks, said collecting device (3) being situated under the workstation (2) and comprising a portion (44) which is at least horizontally movable with regard to the workstation (2) and means (46) for moving this portion (44). The workstation (2) is movably up and down above the horizontally movable portion (44) of the collecting device (3) and the device comprises means (17, 18) for moving the workstation (2) up and down as a function of the height of the stack formed on the movable portion (44).
