Abstract (en)

[origin: EP0593871A1] The invention relates to a luminaire arrangement having luminaire members arranged one behind the other and/or side by side, and in particular continuous rows of luminaires or lighting trunking with luminaire members juxtaposed in the longitudinal direction. For the efficient production of such luminaire arrangements and, in particular, for simple assembly, the individual luminaire members are provided with at least one, preferably with in each case two plug-in connections which can be fixed in each case by a securing element and, possibly, a fastening element which can be operated from the light-output side. <IMAGE>
