Abstract (en)
[origin: EP0594135A1] In a spray can for spraying liquids under pressure, having a spray head which can be depressed for spraying, and having a spray tube which is connected to said spray head, for a particularly handy design and secure fastening of the spray tube when not in use, provision is made according to the invention for the spray can to have a cuboid basic body (1) and to be provided with the depressible spray head (4) on its top side adjoining a narrow side in a recess (3) of the covering surface (2). The spray head is designed to be pivotable, together with the rigidly attached spray tube (5), in such a way that the spray tube (5) can be pivoted into a longitudinal receiving gap below the covering surface (2) when not in use. <IMAGE>
