Abstract (en)

[origin: EP0594495A1] Method for assistance with driving for a motor vehicle, based on receiving road information by a radio channel, as well interpretation of it in real time by the driver, characterised, on the one hand, in that the latter simultaneously monitors the choice of a route or of a predefined geographical area and listens to or consults information relating to this route or to this area, and, on the other hand, in that he continuously controls the interpretation, simultaneous or otherwise, of other modes of communication and the corresponding use of common reproduction units. <IMAGE>
