Abstract (en)
[origin: WO9302333A1] Described is a sub-calibre projectile of the sabot (pusher-plate) type with discarding cap segments (11). The projectile has a pressure plate (15) with a rearwards-projecting alignment spike (16) which is inserted into a pressure piece (18). Held between the pressure plate (15) and the pressure piece (18) are the bases (24, 25) of the cap segments (11), thus enabling very high gas-pressure forces to be transmitted and the cap segments to be discarded without affecting the target accuracy of the projectile.
