Abstract (en)  
[origin: WO9302269A1] A transparent laminate comprising at least two transparent layers, a transparent interlayer bonded therebetween and a stiffening member (14), the interlayer having at least one free surface to which the stiffening member (14) is bonded. Also a monolithic transparency comprising a transparent polymer or resin (40) having a cavity adjacent an edge, and a stiffening member (42, 44) partially located in the cavity and extending from the transparency.
