Abstract (en)
[origin: WO9323156A1] A screw container (1) is suitable as a dispenser of pharmaceutical and/or cosmetic ointments, pastes, creams, gels, emulsions or the like produced with a stirrer, with or without the admixture of solid components. The dispenser can also be used as a mixing vessel when prescription mixtures are produced. The screw cap (26) that can be screwed on an outer thread (8) of the body of the container has a closable central opening (30) through which the driving shaft for the stirring tool of a stirrer (56) can extend.
