Abstract (en)

Swivel nozzle of an improved type, particularly for use in connection with saunas or similar equipment, comprising a body (1) which is provided with a cavity connected with the source supplying the working medium, and which houses an insert (5) provided with perforations (6) for the working medium to flow out. The insert (5) is mounted in the body (1) by means of an elastic element (8) that rests against a pin (4) which is provided integrally inside the body (1). <IMAGE>
