Abstract (en)

A vortices-activated muzzle stabiliser (2) for a gun that uses pistol cartridges, which muzzle stabiliser (2) comprises a body (6) having: (i) at least one main vent slot (8) which defines a main gas deflecting area for deflecting gases in the form of vortices and which comprises a first portion (10) which extends inwardly at an angle of 90 DEG to the longitudinal axis of the body (6) from a peripheral portion of the body (6) towards a central portion of the body (6), and a second portion (12) which extends inwardly beyond the first portion (10) towards the central portion at an angle of less than 90 DEG to the longitudinal axis of the body (6); (ii) a barrel connecting bore (14) for affording a connecting passage between the muzzle stabiliser (2) and a barrel (4) of the gun; and (iii) an exhaust gas aperture (16) which is positioned at a downstream end of the body (6). <IMAGE>
