Abstract (en)
[origin: WO9303125A1] Aqueous compositions for lubricating continuously moving conveyor systems, comprising octanoic acid soap and oleic acid soap and, optionally, anionic surfactant and/or sequestering agent, demonstrates an improvement in lubricity and an increased tolerance to bottling fluid contamination on PET bottling lines.

Abstract (fr)
Des compositions aqueuses pour la lubrification de systèmes de convoyeurs à déplacement continu, comprennent des savons acides octanoïques et oleïques et facultativement, un tensio-actif anionique et/ou un agent séquestreur. Ces compositions démontrent une amélioration du pouvoir lubrifiant et une résistance accrue à la contamination par le fluide de remplissage des bouteilles sur les lignes de remplissage de bouteilles PET.
