Abstract (en)
[origin: EP0597161A1] Hybrid device for drawing off a liquid of the type with a slight pressure or slight partial vacuum, particularly applied to the operation of bottling wine comprising at least one buffer reservoir (10) for this liquid, a dispensing head (12) equipped with a moving shutter (62) and designed to receive the neck of a bottle at its lower end, a canula (hollow needle) (30) for the return of air and relevelling mounted in the buffer reservoir, driven in terms of translation by a cam on the outside of this buffer reservoir and also mounted slidably in leaktight fashion through this dispensing head, characterised in that it comprises a circuit (16) for injecting a neutral gas at a slight pressure, a circuit (20) with a slight partial vacuum, and a venting circuit (18). The subject of the invention is also the associated cleaning device. <IMAGE>
