Abstract (en)
The stick includes a shaft, a blade and a heel forming the link between the blade and the shaft. It includes a core comprising several parts (11, 12, 13), each part being produced from synthetic foam having a density which is different from that of the other parts, based on different materials, so as to adapt the strength and the characteristics of each part to the particular local constraints of the stick. The core is covered with three layers of braided materials (1, 2, 3). <IMAGE>

Abstract (fr)
La crosse comporte un manche, une palette et un talon effectuant la liaison entre la palette et le manche. Elle comporte un noyau comprenant plusieurs parties (11, 12, 13), chaque partie étant réalisée en mousse synthétique de densité différente de celle des autres parties, à base de matériaux différents, de façon à adapter la résistance et les caractéristiques de chaque partie aux contraintes locales particulières de la crosse. Le noyau est recouvert de trois couches de matériaux tressés (1, 2, 3). <IMAGE>
