Abstract (en)

[origin: EP0597248A1] The invention relates to a tool head for a crimping press having a clamping-in device which comprises a T-bolt which projects from a crimping level control wheel and is designed for connection of the tool head to a T-holder or T-groove of a plunger of the crimping press, the T-bolt being mounted on the control wheel such that it can be adjusted axially, and a detachable locking device being provided by means of which the axial position of the T-bolt can be set on the control wheel. <IMAGE>
