Abstract (en)
[origin: WO9325447A1] Pot comprising a body, a container and a lid hinged to the body, characterized in that the container (2, 32), closed by means of a movable wall (3, 33) isolating the substance from the outside, communicates with the suction side of a dosing pump (12-17, 40, 39) which is incorporated in the body and which discharges the substance into an incorporated receptacle (15, 56) which is covered, when not in operation, by the lid (21, 34); and in that the reversible operation of opening the lid first gives access to the receptacle and then actuates the pump.
