Abstract (en)

[origin: WO9219509A1] A separate fold-free region (25) is used to cover those areas left uncovered by the folded packaging (26) when it is wrapped around an object. In an alternative embodiment, a separate semi-rigid strip (27) is used to make the packaging mechanically resistant to vertical loads.

Abstract (fr)

La zone sans pli (25) rapportée permet de recouvrir les zones non recouvertes par le déploiement de l'emballage plissée (26) autour de l'objet. Dans une variante de l'invention, une bande semi-rigide (27) rapportée permet d'adjoindre à l'emballage une tenue mécanique à la charge verticale.
