Abstract (en)
The flue cleaning device (8) and the relevant process allow the cleaning from the lower end of the flue (1) by introducing the device along a horizontal path through an opening (2) in the wall of the flue and providing deflecting means (16,17) to guide the device (6,8) upwardly in a vertical direction (3). Means (29) are provided to close and seal the opening (2) and aspirating means (53,56,57,58) for collecting of debris scraped from the wall. <IMAGE>
