Abstract (en)
The invention relates to an improved technical unit (block) (1, 1', 1'', 1''') for a swimming pool. This unit has a watertight cavity (13, 13', 13'', 13''') arranged adjacent to the swimming pool and comprising a front-face partition (7) which forms a wall of the swimming pool and on which various inlet/outlet members for treating (filtering, heating, etc.) the water contained in the swimming pool are mounted, and at the rear of which functional elements (valves (43), filter (31), heating resistor (element), pump (33), pump motor) capable of providing the said water treatment functions, are mounted in the cavity. <IMAGE>

Abstract (fr)
L'invention concerne un ensemble bloc technique (1,1',1'',1''') perfectionné pour piscine. Cet ensemble présente une cavité (13,13',13'',13''') disposée adjacente à la piscine, étanche, et comprenant une cloison de face avant (7) formant paroi de la piscine et sur laquelle sont montés divers organes d'entrée-sortie pour le traitement (filtration, chauffage...) de l'eau contenue dans la piscine, et à l'arrière de laquelle se trouvent montés dans la cavité des éléments fonctionnels (vannes (43), filtre (31), résistance de chauffage, pompe (33), moteur de pompe), propres à assurer lesdites fonctions de traitement de l'eau. <IMAGE>
