Abstract (en)

[origin: EP0599675A1] Sheet of security paper comprising a thin region 7 with a thickness of less than 80 micrometres and a thick region 8 with a thickness greater than 50 % of the thickness of the thin region. According to the invention the rectangular sheet comprising a middle region situated transversely is coated on at least one face with the aid of an aqueous composition containing a binder and a filler and of a composition containing an aqueous dispersion of polyurethane, kaolin and glycerine. Application as security paper sheet.
