Abstract (en)

[origin: WO9213152A1] The invention concerns a mounting for articulated-arm awnings, the mounting having at least one bracket (1) and at least one single-part or multi-part support arm (2) attached to the bracket. The support arm has an internal space designed to accommodate a spindle holding the awning cloth or a casing enclosing a spindle holding the awning cloth. The mounting is characterized in that the lower edge of the bracket (1) has in it a downwards-facing groove (3) designed to permit attachment bolts to enter and able to accommodate at least one threaded nut (4). The lower rear section of the support arm has a rearwards-protruding flange (5) with a bore (6) designed to accommodate fixation bolts (7) screwed into the nut (4).
