Abstract (en)
[origin: FR2680475A1] The dispenser comprises a flexible bag (2) containing a liquid or paste (6) and housed in a container (5) having a rigid wall (53) with an elastic bellows (51), a handle (43) and a closure system (3) which opens or closes when the product (6) is not at an adequate pressure. By pressing on the handle (43), the air trapped between the container (5) and the flexible bag (2) exerts adequate pressure on the product (6). The dispenser also comprises a cap (42). The dispenser neck (41) is connected by film hinges (48, 49) to both the handle (43) and the cap (42).
