Abstract (en)
A multicolor embroidery machine exchangeably uses different color threads to make embroidery on cloth. The different color threads are fed from a plurality of thread supplies to a selection device (10). The selection device selects one of the threads (20). Only the selected thread is transported by means of an air flow to a needle for stitching and then stitched on the cloth. The selection device (10) transports by means of an air flow one of a plurality of threads respectively fed to a plurality of inlets (33), to an outlet (34), and then feeds out the thread therefrom by means of an air flow.
