Abstract (en)

[origin: EP0600561A1] Novel yellow dye-forming couplers, and photographic elements, emulsions and processes for developing images utilizing the novel couplers, are disclosed. The novel couplers include (a) an acyl acetanilide in which said acyl group includes a multicyclic carbon center attached to the carbonyl moiety, and (b) an aryloxy coupling-off group at the coupling position of the acyl acetanilide, said coupling-off group having at least one substituent which is an ionizable group or a solubilizing group.
