Abstract (en)

[origin: EP0600813A1] The present invention relates to a connection device, in particular for a mixing or combining tap. Device, characterised in that it is integrated with the tap body and can be adjusted, and in that it has, for each supply side, i.e. a cold water supply side and a hot water supply side, at least two connection orifices (2), one of which is provided with a double connector (3) and the other of which is provided with a plug (4). The invention is more particularly applicable in the field of dispensing sanitary or heating fluid. <IMAGE>
