Abstract (en)

[origin: DE4128381A1] Use of a hydrogenated, low-volatility active ingredient in additive technologies for the purpose of improving the keep-clean performance in respect of gasoline engine inlet systems and of optimizing the cost-to-benefit ratio of gasoline additives.

Abstract (fr)

Utilisation d'un principe actif hydrogéné de faible volatilisé dans des techniques relatives aux additifs afin d'améliorer les aptitudes de maintien de propreté en ce qui concerne les systèmes d'admission de moteurs à essence, et d'optimiser le rapport frais-profit des additifs d'essence.
