Abstract (en)
[origin: EP0601450A2] The invention relates to a device (1) for orienting conical yarn tubes in the same direction, having a feed device for supplying individual, horizontal yarn tubes 3, having an inclined surface 5, arranged downstream of said feed device, with a direction of inclination transverse to the longitudinal axis of the tubes, and having a loading element 6 which adjoins the inclined surface 5 and receives the oriented yarn tube 3. Arranged below the lower edge 13 of the inclined surface 5, as loading element 6, is a funnel 7 which leads to a loading device 10. The drive 30 of the feed device 2 is connected to a control unit 15. <IMAGE>
