Abstract (en)
[origin: EP0601667A1] The invention relates to an electrical cable comprising: an electrically conducting core; a first semi-conducting jacket arranged therearound; an insulating jacket arranged therearound; a second semi-conducting jacket arranged therearound; an electrically conducting earthing jacket arranged therearound; a sealing jacket arranged therearound which is expandable under the influence of water; an electrically conducting outer jacket arranged therearound; and electrical conducting means which place the earthing jacket and the outer jacket locally in mutual contact. Present for this purpose in the cable according to the invention are the electrical conducting means which place the earthing jacket and the outer jacket locally in mutual contact. <IMAGE>
