Abstract (en)
[origin: EP0601971A1] Process for trichromatic (trichromic) dyeing or printing of natural or synthetic polyamide fibre materials which comprises using at least one blue-dyeing anthraquinone dye of the formula <IMAGE> where R1, R2, R3 and R4 are each independently of the others hydrogen or C1-C6alkyl, the sum of the carbon atoms of the radicals R1, R2, R3 and R4 being 4, 5 or 6 and the sulpho group in the anthraquinone dye of the formula (1) being attached in the designated 6 or 7 position, together with at least one red-dyeing of the formula (2) and at least one of the yellow- or orange-dyeing dyes of the formulae (3), (4) and (5), the dyes of the formulae (2), (3), (4) and (5) having the meanings specified in Claim 1. The process of the invention is suitable for dyeing natural or synthetic polyamide materials from an aqueous liquor or for printing with print pastes.
