Abstract (en)
[origin: EP0602411A1] The suture package has a folding card (10) which contains a thread bundle (34a) laid in a meandering shape. The thread bundle (34a) is led through a passage opening (28) out of the folding card (10) and its ends are fixed on a thread-holding plate (15). When an individual thread (34) of the thread bundle (34a) is pulled out of the folding card (10) the passage opening (28) retains all other individual threads. Controlled removal of individual threads is possible thereby. <IMAGE>
