Abstract (en)

[origin: EP0603075A1] The invention relates to a device for successive presentation of posters, the sides of which are of a defined length, comprising, in a casing (32) including at least one flat viewing panel, a plurality of parallel vertical shafts (2, 4, 6, 8, 10, 12) keeping an upper endless belt (14) and a lower endless belt (16) respectively tensioned at their ends, and a plurality of transverse bars (24) fixed by their ends to the said endless belts and separated from one another by a distance substantially equal to the length of a side. Each poster is fixed only to the upper endless belt (14) and to one transverse bar (24) acting as a support post. <IMAGE>
