Abstract (en)

The system includes series of fluid delivery openings (6) formed in a first distribution head (30) which is suspended from a mobile ceiling-mounted arm (4) and column (1) assembly. A second distribution head (2) is supported directly by the column and includes a second series of fluid delivery openings (7). The column is hollow, with a number of rigid fluid delivery conduits housed within its body. A branch conduit leaves each conduit within the second distribution head, and delivers fluid under the control of a cut-off valve, to a flexible conduit housed within the hollow body of the arm and leading to the first distribution head.

Abstract (fr)

Ce réseau est destiné à alimenter une série de prises de fluides (6) qui sont montées sur un boîtier distributeur (30), dit principal, ce dernier étant supporté par un bras plafonnier mobile (4) monté pivotant sur une colonne (1), et il comprend un second boîtier distributeur de fluide (2), dit auxiliaire, qui est fixe et supporté par ladite colonne (1), ce boîtier auxiliaire étant muni d'une série de prises de fluides de secours (7). Equipement de salles d'hôpital, par exemple de réanimation ou de réveil. <IMAGE>
