Abstract (en)
[origin: WO9305484A1] A reel mechanism (10) comprising a support (12) which carries a motor (14), a reel (16), a lamp (26) and an optical device (28); the motor carrying the reel, the reel including both a reel strip (18) provided with symbols (20) to be illuminated by the lamp as well as a reel support (22) provided with a tab (24) to be sensed by the optical device, and the lamp being adjustably movable relatively to the support; characterised in that the optical device (28), and preferably the motor, are also adjustably movable in unison with the lamp (26) relatively to the support (12).
