Abstract (en)

[origin: DE4130359A1] A device designed as a magazine is disclosed for carrying away printing plates from the plate cylinder of a printing machine, in particular to ensure the automatic exchange of printing plates. The device has an arrangement for carrying away the plates with (first) holding means for each printing plate capable of being activated. The (first) holding means (17) are arranged on a (first) carriage (20) that can be moved along a (first) guide (21) more or less over the whole length of the device, inside the magazine (4).

Abstract (fr)

L'invention concerne un dispositif se présentant sous la forme d'un magasin pour le retrait des plaques d'impression d'un cylindre porte-plaque d'une machine d'imprimerie, notamment pour un échange automatique desdites plaques. Ce dispositif comporte un système de retrait des plaques, lequel possède, pour chaque plaque d'impression, des (premiers) moyens de retenue actionnables. Ces (premiers) moyens de retenue (17) sont disposés sur un (premier) chariot (20) qui se déplace en suivant un (premier) guidage (21) approximativement sur toute la longueur du dispositif, à l'intérieur du magasin (4).
