Abstract (en)

[origin: EP0603807A1] The invention relates to a set of concrete paving stones, its use, a method for making and packing the same and a mould therefor. The set consists of a multiplicity of artificial stones (A1-H15) made of concrete in paving-stone format, which can be placed against one another in a rectangular stone pattern and have a multiplicity of different contours which describe a natural-stone-like irregular contour line along the sides of their respective basic format, the artificial stones in the rectangular stone pattern occupying at least three rows (A-H) and at least three columns (1-15) and the number of artificial stones per row (A-H) and per column (1-15) being equal in each case, and furthermore a multiplicity of artificial stones (A1, E9, F15) with quadrilateral basic formats differing from the rectangle being provided and in the rows (A-H) artificial stones (A1-A15) with basic formats differing from one another being provided. The invention provides for the set to be designed in such a way that in the rectangular stone pattern capable of being laid therewith also in the columns (1-15) artificial stones (A9-H9) with basic formats differing from one another are provided and a multiplicity of artificial stones (A5, A14, E15, D5) with pentagonal basic formats are provided, which are distributed over the rows (A-H) and over the columns (1-15) of the rectangular stone pattern.
