Abstract (en)
The antibending device comprises an articulation element (4) which tapers in the extent of the cable, can be bent elastically by means of recesses (5) in the material and can enclose a plug cable (3) and has joined to it on the plug side a housing (2) which encloses a plug (1). Here, the housing (2) which is integral with the articulation element (4) consists of two half shells (5,6) which are connected to one another by means of a film hinge (8) so as to be capable of being folded closed and folded open. <IMAGE>

Abstract (de)
Die Knickschutzvorrichtung umfasst ein, sich in Kabelerstreckung verjüngendes, durch Materialausnehmungen (5) elastisch biegbares, ein Stecker-Kabel (3) umschliessbares Gelenkstück (4), an welchem sich steckerseitig ein, einen Stecker (1) umschliessendes Gehäuse (2) anschliesst. Hierbei besteht das mit dem Gelenkstück (4) einstückige Gehäuse (2) aus zwei, über ein Filmscharnier (8) miteinander zu- und aufklappbar verbundene Halbschalen (5,6). <IMAGE>
