Abstract (en)

[origin: EP0604055A2] A hood release arrangement has a main latch which normally holds the hood 10 fully closed, and a safety latch which continues to hold the hood closed after the main latch has been operated to open the hood. The safety latch is operated by a release lever 28, and the release lever and the safety latch are connected by a Bowden cable 30 extending from the release lever which is mounted at the front end of the hood to the safety latch which is concealed beneath the hood.
