Abstract (en)

[origin: EP0605310A1] The present invention relates to the specific field of handling mail. More particularly it addresses a printing mechanism allowing recognition of the mail transporter on the basis of the franking stamp applied to an item of mail and previously selected by the user of the franking machine. The means of selecting items of mail as a function of the transporter or courier service consists in the printing of a specific mark for each item of mail as a function of the corresponding transporter. <IMAGE>
