Abstract (en)
[origin: EP0606196A1] Closure device for door, comprising a safety device (103) provided with a web (105), a head plate (2) which has two holes, a bolt and a closure member (30) designed to lock the bolt (6), noteworthy in that the bolt (6) has a side surface (98) designed to interact with the closure member (30) and being practically parallel to the support plate (20), and in that guide means (36) are provided which attach to the said support plate (20) so as to allow lateral sliding of the closure member (30) with respect to the bolt (6) and parallel to the side surface (98) of the bolt (6) between the bolt (6) and the guide means (36), under the action of the web. <IMAGE>
