Abstract (en)

[origin: WO9307270A1] The present invention provides nucleic acids encoding GPA protein, as well as GPA protein produced by recombinant DNA methods. Such GPA protein is useful in preparing antibodies and in diagnosing and treating various neuronal disorders.

Abstract (fr)

L'invention concerne des acides nucléiques codant pour la protéine GPA, et aussi sur la protéine GPA produite par des procédés impliquant de l'ADN recombiné. Cette protéine GPA est utile pour préparer des anticorps et diagnostiquer et traiter divers troubles neuronaux.
