Abstract (en)

The invention relates to a razor head of a wet razor having a single or double razor blade which is arranged at the front end of a handle inside a plastic casing and having a front protective strip, and to a method for producing such a razor head. In order to improve a razor head of a wet razor and a method of production thereof, in the case of which the components of the razor head are fastened to one another by means of an adhesive, at least one plastic part has at least one notch which takes the form of a shaft for the application of adhesive. The razor head is initially assembled without adhesive and the adhesive is applied to the assembled razor head in a single operation. <IMAGE>
