Abstract (en)

[origin: EP0607854A2] A sheet of plastic, in particular for lining concrete structural parts, preferably consists of thermoplastic material. It is provided on one side with attachments and comprises two layers (1, 2), the layer (1) receiving the attachments (10) being of heat-reflective design and the opposite layer (2) consisting of material of a different colour. The layer (1) receiving the attachments (10) preferably consists of light plastic and the opposite layer (2) of dark plastic. <IMAGE>
