Abstract (en)
[origin: EP0607973A1] The cosmetic case has a tray (2) which is bordered by side walls (3, 3'). In the tray (2) mounts are designed for two inserts. Each mount comprises a recess (12) in the side wall (3'), an opposing first intermediate wall (13) and two second intermediate walls (14) opposing one another. The second intermediate walls (14) also comprise reinforcements (15) in the form of ribs which are provided on the sides facing one another of the intermediate walls (14). The reinforcements (15) effect a firm clamping fit of the interchangeable insert in the intermediate walls.
