Abstract (en)

[origin: EP0608531A1] Automatic central buffer coupling for a rail vehicle with draw and buffer gear (2), a bearing block (5, 6) which is attached to the underframe of the rail vehicle and connected to the draw and buffer gear, a deformation pipe (11) which is adjacent to the bearing block, a nozzle plate (12) which is adjacent to the deformation pipe and a screw connection (13) which axially clamps the bearing block, the deformation pipe and the nozzle plate, permits axial displacement of the bearing block and of the deformation pipe with respect to the underframe and the nozzle plate, and forms a guide for the bearing block. <IMAGE>
